

# Mini Swales

Team Leader: Matt

<http://www.ecofilms.com.au/mini-swales-in-an-urban-backyard/> & <http://permaculture.tv/tag/extreme-permaculture/>

## Steps

1. Dig up existing fruit trees (orange, apple, verna lemon, lots-a-lemons).
2. Mark out two swales locations according to plan and A-frame
3. Line berm base with clay and sticks
4. Excavate swales mixing with compost
5. Line swale base with clay.
6. Create ramps for path to access storage area behind shed.
7. Mulch area
8. Plant fruit trees on berms
  - a. orange, apple, verna lemon, lots-a-lemons, shatoot mulberry, quince, kaffir lime
9. Plant guilds around all fruit trees including the existing feijoa, olives, kefir plum, mulberry
10. Seed with chop and drop seeds (rye, fenugreek, peas, lupin, buckwheat mix)
